- ○ jQuery ○ JSON ○ AJAX
- React Framework, React Router (1 year)
- PHP
- Node & Express Framework (1 month)
- MYSQL
- Git(hub)
- Figma
- Adobe Creative Suite (3 years)

## SUMMARY

---

I have been coding for just under a year now and enjoy it greatly. I have a degree in accounting and business administration; I decided to transition to web development because I enjoy a challenge, with web development offering more unique obstacles. I relish reading and learning about programming languages and always pick up a book when I have the chance. I am hoping to eventually become a full stack web developer and am currently learning Node.js design patterns with Express.
