  - Bootstrap
- JavaScript and ES6 principles
  - JSON ◦ AJAX
- React Framework
- PHP
- Node (<1 month)
- Express Framework (<1 month)
- MYSQL
- Git(hub)
- Figma
- Adobe Creative Suite

## SUMMARY

---

I have been coding for just under a year now and enjoy it greatly. I have a degree in accounting and business administration; I decided to transition to web development because I enjoy a challenge, with web development offering more unique obstacles. I relish reading and learning about programming languages and always pick up a book when I have the chance. I am hoping to eventually become a full stack web developer and am currently learning Node.js design patterns with Express.

## EDUCATION

---
